

METALLURGICAL

INFRASTRUCTURE

Total Area: 30,000 m² & Covered area: 10,000 m²
 Steel workshop: 3,200 m²
 Iron - stainless steel Workshop: 2400 m² (converted into work area for N II for Nuclear)
 Storage area: 15,000 m²
 Workshop for blasting and painting: 1800m²

Main Equipments:

- 3 Shearing machines Larg.4000 Ep.12
- 1 Rig Flame and Plasma Cutting machines CN Chamfering Long.1200 Larg.3000
- 3 Press Brakes Larg.5000
- 4 Rolling Benders Larg.3000 - Ep.50mm
- Rotators / Positioners Puiss.40T

- 3 Brackets for automatic welding
- 3 units of Arc-air Gouging
- 80 Welding Stations for various welding techniques

- 11 Overhead Cranes up to 25T
- 4 Elevator Lifts up to 6T
- 2 Cranes up to 20T

- Material Non Destructive Testing (NDT): Penetrant, Radiographic and Magnetic
- 2 Hydraulic Pumps up to 600b

INFRASTRUCTURE

Creation date: 1976

Turnover 2009: 7.2 M €

No of employees: 63

QMOS certification Number

- 79 for stainless steel
- 22 for steel

Management Team

CEO : Didier LESCAUT

Technical Sales:

Boiler Making: Patrick ETIENNE

On-site Work : Jean-Luc ALARY

Export Sales: Pauline LESCAUT

Quality : Daniel GILBLAS
(IWT Welding Technology)

HSE : Romain LESCAUT

MAJOR CLIENTS

ALFA LAVAL	VALVES
AIR LIQUIDE	KSB AMRI
SULZER	SEGAULT
DRYER AND GRINDER	SPIRAX SARCO
BHIL	SNRI
COMESSA	FLOWSERVE
SILENCER	SERCO
SILEO	VELAN
AUTOClave	FLUIDES SERVICE
AIGLE	ITHER
AERAZUR	
EADS	
DCN	
SNECMA	
INDRAERO	
FERSO	

VALVES :SOTECH INDUSTRIE manufactures, partially or in full, valves as per designs provided by the customer.

AUTOClave: SOTECH INDUSTRIE manufactures Autoclaves based on a 15 year old partnership, for various industry applications

STEAM BOILER: Due to longstanding association with boiler-making, SOTECH INDUSTRIE has superior expertise in welding and on-site installation of boilers and other pressure vessels.

DRYER AND GRINDER: SOTECH INDUSTRIE manufactures dryers and grinders for processing of materials with multiple applications, based on client activities.

SILENCER: SOTECH INDUSTRIE designs and manufactures silencers for exhaust systems handling steam, gas or fluid flow in transmission or as an output.
